THE 2017 NATS IS SPONSORED BY

JETT Engineering, Inc.

Muncie
VISITORS BUREAU INDIANA

Friday starts Altitude Limited Electric Soaring (ALES), the last event of Soaring week at Nats 2017.

For the uninitiated, here is what the event is all about. The contest is flown with an electric-powered sailplane that has an electronic device that limits launch altitude to 200 meters with 30 seconds or less of motor run. This is affectionately known as “a winch in the nose.” The flight task is a 10-minute maximum flight

with a 50-point maximum landing tape.

The event is flown man on man with 10 to 11 people in a flight group. Because altitude is limited, this puts the emphasis on a pilot’s soaring abilities because the planes are all starting at the same altitude.

All types of aircraft are competitive in this event—from the foam Radian to state-of-the-art four-meter molded sailplanes. There are 51 pilots entered for this year’s two-day

contest, with Wally Adaszczik as contest director on site 4.

The weather forecast for Friday looks a little wet and windy, but this is Muncie so that can change in a few minutes. Saturday’s weather looks to be great, so come out and watch the pilots test their soaring skills against each other and the Muncie weather to take home the 2017 Nats ALES championship trophy! 🏆

Thursday was a sunny 90°, allowing all pilots to complete the day's assigned rounds. The only weather hiccup was a brief storm that skirted across the field, causing a 15-minute delay as everyone waited for the thunder and lightning to move out of the area.

A great benefit to the competition this year is the continued use of the Electronic Scribe Scoring System. Peter Vogel is the brains behind this technology. He wrote the software and did all of the design work to make this system a success. This programming allows for immediate scoring to take place and be made available.

This is a huge step up from the old way where sheets of scores were handed off to be entered, put into categories, and tabulated, causing a delay in results. The Electronic Scribe Scoring System is a tremendous innovation in the quality of scoring. 🚁

Facundo Coppede and Jorge Ollvella from Argentina.

Ron Barr.

A bottom view of Brian Herbert and Brett Wickizer with their new Pattern aircraft.

Jason Shulman, Will Gross, Chad Northeast, Paul Villarrubia, and Andres Pantarotto.

Brian Herbert and Brett Wickizer's new Pattern model, top view, still secure in it's box.

To say that there was some speculation about Thursday's potential weather conditions would be an understatement.

At the NFFS banquet Wednesday night, it was announced that there might be some thunderstorm activity on Thursday. This made for some concern for some of the entrants.

The first thing on the schedule was Dawn Unlimited. Those who flew were treated to some nice weather, although it had rained the night before. Times weren't the five minutes that one might expect, but Gerald Brown put in a flight of 308 seconds to win.

The rain: To summarize, it was what one could describe as squalls moving through on a periodic basis. Fliers took advantage of those lulls and when it did rain, the stalwarts waited it out under awnings or in their cars. Needless to say, there were a lot of entrants who elected not to fly and some left. Those who did stay put in some aggressive flying as if there wasn't any weather issue.

The flightline was set up in the southeast corner near the camp ground because the drift was nearly northwest. In the morning, the day was great for Free Flight, with mild temperatures and minimal drift. This wouldn't hold and the flightline was moved a couple of times.

About 10:30 or 11 a.m., there was a wind shift with drift heading east and pilots had the option to move to the northeast. The glider pen was also located and then relocated to accommodate the change in wind direction.

The tissue on the tissue-covered models didn't waste any time sagging. And because of the wind shifting, there were quite a few models that decided to hurry up the process and land in the ponds on the south side of the flightline. It meant that somebody had to get their shins wet, but they were probably wet from walking in the grass anyway. I saw a lot of rubber boots on the field.

Gas fliers, being the hearty bunch that they are, wasted little time in putting in flights. Of the 25 entered, only nine did not fly. The

"Selfie" of your NatsNews reporter, Rick Pangell.

other 14 racked up a lot of flying. Brad Bane put in nine maxes in A Gas to win the event—far outpacing the rest of the fliers.

"C" NOS had about 20 entrants, but only eight flew. Times weren't as high as A Gas but were respectable, with Jack Marsh putting up a 790 total for first with six maxes!

SAM OT ABC Pylon was a bit less intense, as it should be, but only four of the 10 entered flew. Ted Firster put in a score of 291 to win the event.

F1P fliers did well. Cade Fedor put in 6-plus maxes and Hayden Ashworth followed for second. The lone ranger of Open F1P was Bobby Hanford with nearly six maxes. And, to the surprise of the top three in the One-Design event, there is money involved! Blake Simon was listed as the winner of the A/B Witch Hawk or Zingo event.

Electric "A" was not to be deterred, even with all of the moisture in the air. Drake Hooke put in a score of 960 (eight maxes!) and you have to give him credit in the humid weather.

Wrapping up the AMA events were F1G and Hand Launch Glider. The F1G fliers didn't shy away from the mistiness. Darold Jones had to tolerate the moisture in the early rounds and get his model to fly in the rain. The wetness put some nasty ripples in his wing covering.

Because of the rain, the CD decided that F1G flights would have the rounds suspended, but pilots could fly at will as long as they

Cockpit details on Duke Horn's P-38.

had all of their flights in by the end of the five-round time limit. Tom Iorger maxed out nicely to win and Mike Richardson and Chuck Markos maxed four rounds for second and third respectively. Hailey Mattson was the lone Senior flier, and Cade Fedor and William Reuter were the Junior fliers.

Hand Launched Glider is a study in concentration. Ever since the introduction of the tip launch, performance has really jumped. The competition is at a very high level and what this means is fliers are focused on just the correct air to fly in.

Yes, there is a lot of gamesmanship in the event. Anything that might give an advantage to finding good lift is mandatory. The best one is piggybacking anything that happens to be in a thermal. This could be eagles, hawks, small birds, or bugs, but what I noticed today was using gas models works too.

Then to add to the fun and challenge, teams were formed. Alas, there were neither max-outs nor long strings of maxes as in the past, but the fun was still there. Ken Bauer won the event and the coveted Tulsa Glue Dobbers Glider Trophy. Cade Fedor won Junior and Kyle Gerspacher won Senior. The BBK team of Batiuk, Buddenbohm, and Krempet took top honors.

Rounding off the day was FAC. I am really impressed with the quality of the models and the effort put into them, and they fly! I watched many flights of two minutes or more!

Here are the results:

- Golden Age: Wally Farrel with 364 seconds (three flights)
- OT Fuselage: Don DeLoach with three maxes
- Embryo: George Bredehoff with 358 seconds (three flights)
- World War II Mass Launch: George Bredehoff
- Greve/Thompson Race: Wally Farrel

And to wrap up the flying, there was a heavy rainstorm to clean the air for the awards, which were followed by the NFFS Beanie Weeny Feed and auction.
